Academic Credential

B.Sc. in Computer Science and Engineering **March 2018 - Present**
Bangladesh University of Engineering and Technology, Dhaka
CGPA: 3.69/4.00

HSC in Science **July 2015 – July 2017**
Govt. Anandamohan College, Mymensingh
GPA: 5.00/5.00

SSC in Science **January 2013 – May 2015**
Mymensingh Zilla School, Mymensingh
GPA: 5.00/5.00

Undergraduate Thesis

"Intrusion Detection in Containerized Environment"

This project aims at addressing unique challenges in containerized environments and building a robust and efficient intrusion detection in containerized environments. This is a collaborative work with Concordia University, Canada.

Supervisor:

1. Dr. Md. Shohrab Hossain; Professor
   Department of Computer Science and Engineering Bangladesh University of Engineering and Technology, Dhaka
2. Dr. Suryadipta Majumder, Assistant Professor
   Concordia Institute for Information Systems Engineering (CIISE), Concordia University, Canada.

Research Interests

- Cybersecurity
- Security in Containerized Environment
- Machine Learning and Natural Language Processing
- Computer Networks

Undergraduate Projects

- Bangla Caption Generation for images (02/2023 – 03/2023)
  - ✓ In this project, a new model is proposed and implemented that can generate Bangla caption for a given image. (https://github.com/Sizvy/Bangla-Caption-Generator-for-images.git)
- Bangla Digit Recognition using CNN (01/2023 – 02/2023)
  - ✓ This CNN model is built from scratch. The applied model showed 77% independent test accuracy and 91% validation accuracy. (https://github.com/Sizvy/Bangla-Digit-Recognition.git)
- TCP Libra (11/2021 – 02/2022)
  - ✓ This is a congestion control algorithm implemented successfully in NS3. (https://github.com/Sizvy/Tcp-LIbra.git)

- Memory Management in XV6 Operating System (11/2021 – 01/2022)
  - ✓ This project is done under the **operating system** course. Two different paging algorithm is implemented in this project. (https://github.com/Sizvy/Memory-Management-XV6.git)

- Englishour (08/2022 – 10/2022)
  - ✓ This is a software development project. Purpose of this project is to create a English Learning Platform for children.
    - **Frontend:** https://github.com/swapped004/englishour_FE.git
    - **Backend:** https://github.com/tawsifshahriar7/englishour-backend.git

- Netflix (11/2020 – 12/2020)
  - ✓ This is a software development project done with Django as backend framework. It was mainly a website to query available shows, watch them online and download them as well. (https://github.com/Sizvy/Netflix_Database_Project.git)

- 29 Cards Game (02/2019 – 03/2019)
  - ✓ Popular 29 cards game is implemented partially in this project. **Javafx** framework is used in this project. (https://github.com/Sizvy/29-cards.git)

Undergraduate Courses

- Object-oriented programming
- Data Structure and Algorithm
- Database Design (along with **High Performance Database Design**)
- Computer Networks and Computer Security
- Discrete and Concrete mathematics
- Operating System
- Machine Learning
- Compiler Design
- Computer Graphics
- Bioinformatics

Technical Skills

Programming Languages: Assembly, C, C++, Java, Python

Documentation and Presentation Tools: Latex, MS Office Suite

Software Development Framework: Node.js, React.js, Django, Javafx

DBMS Tools: Oracle, PostgreSQL

Network Simulation Tool: NS3

Computer Forensic Tools: Strace, Sysdig, Wireshark

Others: Kubernetes, Docker Container, Github

Honors and Awards

- **RISE Research Grant**; Bangladesh University of Engineering and Technology (February 14, 2023)
- **Four times** Regional Physics Olympiad and **One time** National Physics Olympiad Winner(2014-2017)
